*The Journey Home*, the fourth book in the Mind Monster series, again follows Alex's confrontation with dark forces and tyrannical billionaires, opening with the same powerful descriptive force as the previous books:

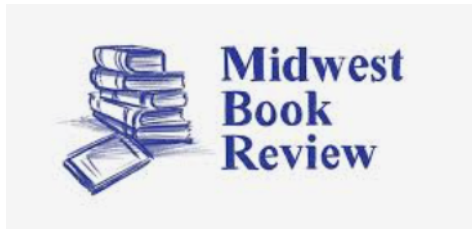

*Alex bolted toward the hallway, her improbable blonde hair streaked dark green disgust and anger black. She raced past her assistant, Dawn, waiting in the outer reception suite.*

Newcomers and prior fans of Alex will be drawn to find the source of her latest angst and will easily absorb the return of mind messenger monster "Spike," whose admonitions direct her life and forge new pathways with the Spiritual Enterprise Network (a covert group that thwarts unknown threats most of the world doesn't know about).

From violating assaults by boss JT Wilson, who reconnects her with men she'd loved in the past, to the efforts of former colleague Hellie to help her, Alex encounters the rich, the deadly, and the dangerous with a strength backed by forces within and outside of her mind.

Prior readers have an edge on absorbing all these characters and influences from previous escapades, making *The Journey Home* especially recommendable to previous fans who will find this latest adventure easy to enter.

Newcomers have plenty to absorb, between paranormal encounters, underlying messages about courage and ongoing healing processes, the impact of vanity and wealth on society, and even kidnappings and robot bodies.

All these facets meld in a work of visionary fiction that is cemented by a proactive, creative main character whose likeable force drives a blend of psychological thriller and paranormal suspense.

Libraries seeking genre-bending stories that can be highly recommended to a wide audience of thriller readers, fans of paranormal fiction, and those who love mystery and suspense packed with unexpected twists and turns will find *The Journey Home* just the ticket. Its top-notch quasi-fantasy offers important insights on self-empowerment, self-love, and friendships.
